

## **Supplemental Data**

**Supplementary Figure 1**

**Supplementary Figure 2**

**Supplemental Table 1.** Genes hypomethylated CD4+ T cells from lupus patients compared to controls. Target IDs represent unique IDs on Illumina Infinium HumanMethylation27 array, Symbol and Product represent gene name and description, Case and Control averages represent percent of methylation in each group, Ratio highlight the level of relative hypomethylation as compared with control group, *P* value represent statistical significance of associative t-test (0 indicates p-value too small to be outputted).

Target ID	Symbol	Product	Case average	Control average	Ratio	P value

**Supplemental Table 2.** Genes hypermethylated CD4+ T cells from lupus patients compared to controls. Target IDs represent unique IDs on Illumina Infinium HumanMethylation27 array, Symbol and Product represent gene name and description, Case and Control averages represent percent of methylation in each group, Ratio highlight the level of relative hypermethylation as compared with control group, *P* value represent statistical significance of associative t-test (0 indicates p-value too small to be outputted).
